WHAT WE DO

Our Services

We're a cross-disciplined collective of industry veterans who bring passion and purpose to creating brand experiences and digital products that matter.

Digital

Our team of visual designers and web specialists work together to create elegant, useful, unique solutions to a wide variety of business challenges.

Interactive

From VR, AR, mixed reality, projection mapping to interactive installations, we help you conceptualize your brand's vision using Future Technology Experiences.

Event Solutions

We combine technology, design and experience to deliver comprehensive solutions and integration services.

OUR SERVICES

Digital

Our team of visual designers and web specialists work together to create elegant, useful, unique solutions to a wide variety of business challenges.

Design and Branding

We craft one-of-a-kind business identities that capture the essence of your brand and effectively communicate it with simple and compelling visual design.

Website Design

We create dynamic and striking websites to give your customers unparalleled digital experiences on any browser, device, and platform.

Digital Marketing

Our team of visual designers and web specialists work together to create elegant, useful, unique solutions to a wide variety of business challenges

Website Development

We specialize in web applications that are created to meet business challenges regardless of their requirements, whether they are single paged or customized and complex web applications.

OUR SERVICES

Digital

Our team of visual designers and web specialists work together to create elegant, useful, unique solutions to a wide variety of business challenges.

Mobile Apps

Turn concepts and ideas into a reality, from conceptualization to completion – App design and development for iPhone, iPad, Android, and other smart phones/tablets.

Web Apps and Games

We have more than 12 years of experience and specialize in mobile game development on both Android and iOS platforms.

Search Engine Optimization

Building your online presence requires much more than launching a website. With saturated markets, your success against competition rests on your ability to attract the right visitors.

Support and Maintenance

Like businesses, websites are always evolving in order to adapt to market conditions and more effective business strategies. We offer web maintenance and support services in Dubai.

OUR SERVICES

Interactive

Interactive installations: we help you conceptualize your brand's vision using Future Technology Experiences

Mixed Reality

GTECH offers a one-stop-shop approach to mixed reality (MR) solutions and our capabilities include video sequence, graphics, and animation creation, e-learning content, developing software as well as web services integration.

Augmented & Virtual Reality

We offer a one-stop-shop approach to AR & VR development. As a AR/VR solutions company, we create custom experiences that are interactive.

Interactive Installations

Interactive installations are exciting digital, light, or video displays that transform physical spaces with responsive technology, sound, and light. An interactive digital installation turns passive audiences into engaged participants.

Projection Mapping

We offer full production services for the visual end result, including the 3D representation and scripted timelines.

OUR SERVICES

Event Solutions

Streaming Solutions

We specialize in webcasting and live streaming services. With our teams locally available, we've got the resources to cover events of all sizes across the UAE.

Registration System

Quickly collect all the right information to plan and coordinate meaningful events using our registration software & services.

We combine technology, design and experience to deliver comprehensive solutions and integration services

Event Promotion & Feedback

Communications will help build excitement, keep attendees engaged, increase attendee loyalty, and drive sales opportunities. Work with us to improve attendee experience for current and future events.

Virtual Experiences

Create engaging meetings, conferences, and online sessions with our virtual events platform

Tools

● Ticketing system - JIRA

All tickets are logged in our help desk directly by the client or via email. We track the response time and effort on each task this is provided back to the customer monthly or on request

● Repository system - Bitbucket

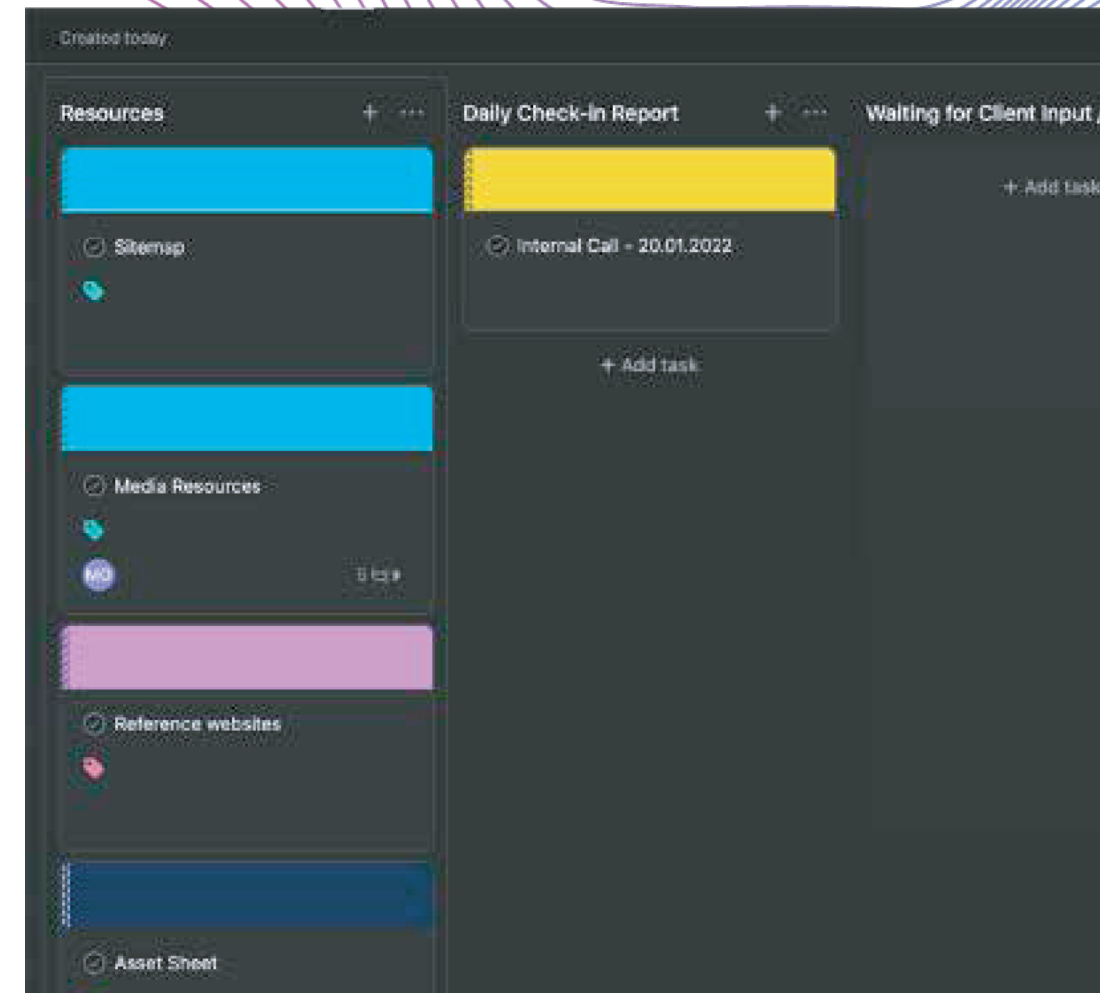

Bitbucket is a Git-based source code repository. Bitbucket gives our team one place to plan projects, collaborate on code, test, and deploy.

● Testing System - Cypress

Cypress is front-end testing tool for our developers and QA engineers.

● Internal Task Management - Asana

We use Asana internally to organize, track, and manage client projects.

Our Team

GTECH's vision is to create value for our clients and serve as a one stop shop for everything digital. We believe cost-effective digital and systems solutions should be the norm and accessible to all.

Efficiency

We believe efficiency is the key to happy clients and effective and productive teams. Our implemented workflows helps us deliver high-quality services in the quickest turnaround time.

Quality

We work tirelessly to deliver our best - From hardware installations to ensuring your brand is always online. Our team of industry veterans are passionate about their work and have excelled in their field.

Transparency

We believe that keeping things clear and well thought-out is the only way of doing business. Our meticulous planning is reflected in our proactiveness and dedication to every one of our clients.

MEET OUR FOUNDER

Gurshinder Singh

With a background in programming cross-platform Web Applications, Gurshinder Singh specializes in building mission-critical systems for enterprise and government organizations.

Gurshinder founded GTECH in 2008, a full-service digital agency based in Dubai. Combining technology, design and experience, GTECH delivers comprehensive technology solutions and integration services.

Today, GTECH employs more than 30 employees in Dubai, India & Philippines and continues to build digital, interactive and turnkey solutions to reduce overheads, increase productivity and revenue through digital transformation.

Digital First Events With GTECH

We are a full-service agency on the leading edge of an every-changing digital space. We believe that cost-effective digital and systems solutions should be the norm and accessible to all.

Hosting Digital-First Events

GTECH is here to support you when it comes to planning and hosting best-in-class digital-first events in Dubai.

For event organizers that are facing cancellations or postponements in the United Arab Emirates, virtual events can be an effective in continuing your events program and goals. Our experience in helping customers host virtual events will guide you if you are considering transitioning to virtual.

This guide will help you understand how to take your event online.

Advantages Of A Virtual Event

- Building brand awareness
- Generating leads
- Creating and accelerating sales pipeline
- Driving revenue
- Retaining customers
- Engaging and educating prospects and customers
- Continuity of business operations

What Do You Need To Consider?

- Are you hosting an internal or external event?
- What type of event are you hosting?
- Is it a single-day event?
- Is it a local or international event?
- Is it a more complex, multi-session event that may
- require additional engagement tools?
- How many participants do you anticipate?
- Which sessions will be pre-recorded or streamed live?
- How will you ensure that live streams are high-quality
- and without disruption?

How Can We Help?

With our Event Marketing and Management experience, GTECH can support your entire event lifecycle, no matter the size, or complexity of your virtual events.

Event Website

Build branded and professional event websites to communicate the value proposition of your virtual events. Invitees can access important event information, such as agendas, speakers, exhibitors and sponsors, and FAQs.

Registration

Capture registrations for your virtual events, with the ability to create dynamic registration paths, collect attendee preferences, ask pre-event questions, and securely process payments if necessary.

Event Promotion

Send targeted, personalized, and automated emails to engage the right audience, boost response rates, and drive attendance. Communications will help build excitement, keep attendees engaged, increase attendee loyalty, and drive sales opportunities.

Virtual Experiences

Incorporate an interactive, virtual experience to surprise and impress your attendees. Browse and book curated virtual experiences to promote engagement, team building and fun.

Online Event Guide & Mobile App

Through a mobile event app or web experience, attendees can access all key event information and you can use features like live Q&A, polling, feedback surveys, and gamification.

Event Promotion

Collect attendee feedback through registration surveys, live session polling, live Q&A, native surveys within your mobile app, post-event surveys, and more. Use these actionable insights to improve future virtual events.

Event Live Streaming Basics

Before starting to live stream, ensure you have sorted out the technical aspects of streaming – from testing your internet connection to making sure you have the right hardware and software.

INTERNET

First you need to make sure you have good upload bandwidth by speed testing your network. Repeatedly test it to ensure a consistent range. According to streaming standards, these are the minimum requirements for the different quality formats:

- Standard Definition Video: 3Mbps
- 720p & 1080p High Definition: 5 to 10 Mbps
- 4k Ultra High Definition: 25Mbps

SOFTWARE

There are many types of encoders, and the best one for you depends on your needs. Make sure to evaluate the products and decide which option makes the most sense for your business.

Stream Your Live Event from Dubai

WEBCAM

Webcam is an easy way to go live using your computer, without the need for live streaming encoding software.

MOBILE

You can stream from your mobile devices as well, without the need for live streaming encoding software.

STREAMING WITH ENCODER

Streaming using an encoder lets you do more with your live stream. You can use external audio/video hardware, involve multiple cameras and more.

Schedule & Strategy

It's important to create a schedule and strategy around how and when you host your live virtual events.

Here are some tips to help you optimize

Preparation

- Prepare your live stream in advance of your stream date

Pre-event Marketing

- Consistently tease your event with posts on social media
- Remind viewers periodically via SMS or Emails

Community Engagement

- Interact live with your biggest and viewers. Help foster conversation
- and deepen the connection with your present to make your viewers feel
- a part of your content and community.

Post-event Marketing

- After your stream, consider creating a highlight video to drive audiences
- to the full archived live stream.
- Consider editing some of your best live moments into more digestible
- highlight reels to reach a broader audience. These videos can act as an
- anchor to expose new audiences to your next live stream.
- After the stream, create FOMO & reward viewers in attendance with
- recaps, inside jokes or shout outs on social media platforms.

Ready To Start?

Our team will work with you to make sure you're all set up for success.

- We'll discuss your event marketing and management needs. We'd like to understand your event program and what you're hoping to accomplish.
- Share with us the details of your existing virtual meeting solution provider. If you don't have one, let's talk through your web conferencing needs and we can help make a recommendation.
- We'll help to handle integrating your virtual meeting solution.

Our Process

01 Discover

Through the discovery phase we analyse your preferences, align with your goals and understand your requirements

**1**

03 Design

We deliver our commitment by focusing on the user experience (UX), developing sketches and wireframes to communicate the experiences we've created and then critically refining and polishing, based on your feedback, and feedback from real users

**3**

05 Deploy

When it's time to go live, we use a series of checklists that cover best practice processes and mitigate all possible risk scenarios we've experienced over the years. We're confident that your launch experience will be one to celebrate!

**5**

02 Define

We define the extent of the project, identify engagement opportunities, analyse information, make recommendations and provide you with a roadmap of the work ahead of us.

**2**

04 Develop

Our team of experienced designers and developers apply their expertise and knowledge of current trends to create a unique and impactful product

**4**

Our Methodology

Immersion

Bringing everyone together without distractions for the right length of time.

Parallel Processing

Working on multiple topics at once, even if they are dependent on each other in a non-linear fashion.

Variety

Varying activities, modalities and group composition with diversity of perspectives

Combination

Combining things that don't typically go together and exploring the "white space" between them

Iteration

Creating multiple drafts of multiple outputs and layering on levels of detail, allowing superior ideas to emerge and decision by design.

Test

Testing ideas, decisions and outputs through multiple vantage points and assumptions

Response Time

Our Response time would be

**Maximum of
2 hours on Weekdays**

Monday to Friday
(9am to 6pm)

**Maximum of
2 hours on Weekdays**

Saturday and Sunday
(9am to 6pm)
